APPLICANT: N/A

*Mailing Address:*

P.O. Box 46000  
Newark, NJ 07101  
(973) 273-8000

The game named above is hereby granted a Certification of Permissibility for operation in New Jersey pursuant to the provisions of the Amusement Games Licensing Law, N.J.S.A. 5:8-100 et seq. ("Law"), and the regulations promulgated thereunder, N.J.A.C. 13:3-1.1 et seq. ("Regulations"). This Certification of Permissibility is based upon information supplied by the applicant at the time of application for certification. The game must be operated in accordance with the Law and Regulations, the specifications submitted by the applicant and the conditions set forth in this certification. Any modification of the specifications as submitted at the time of application or the conditions set forth herein, shall immediately void the Certification of Permissibility for any game so operated.

It is unlawful to license or operate any amusement game in the State of New Jersey without a valid Certification of Permissibility or in a manner not in accordance with Certification of Permissibility issued for the game. This Certification of Permissibility contains four pages. This is page 1 of 4.

### DESCRIPTION:

"Pick Three" is a game incorporating three side by side game boards with rotating indicators, or three rotating game boards with stationary indicators, and a lay down board. The lay down board is marked in segments bearing numbers, names and symbols matching those on the game board. The game boards segments are separated by pegs. Player(s) place an entry fee on a segment of the lay down board to indicate his/her choice of the expected winner. Three rotating indicators or three rotating wheels, powered by electric motors, are activated and deactivated by any player by means of electrical push-button switches or similar devices approved of by the Commission, located along the lay down board. The winning numbers, names or symbols are those where the indicators come to rest, on all three game boards, after the motor has been deactivated. Wagering opportunities other than straight bets may be offered.

## **DEFINITIONS:**

“Flapper” means the flexible tip of the indicator.

“Game board” means the segmented board or wheel behind the indicator.

“Indicator:” means the arm, arrow or other contrivance used to indicate the winning segment on the game board.

“Lay down board” means a shelf area in front of and/or sides of the stand/structure containing the game that is divided into segments each of which bears a number, name or symbol corresponding with those on the game board.

“Master control switch” means a switch used to close the circuit allowing electric to flow to the stop and go switches enabling a player to start the rotation of the indicator or game board.

“Obstruction” means any portion of the stand/structure, any light or other type fixture, any box, bag, prize or other material that obstructs the player’s view of the entire play field, except that the game board itself shall not be considered an obstruction of the player’s view of the two feet behind the game board.

“Pin” means the metal pin placed on the outside edge of the game board, between each segment.

“Play field” means an area containing the stop and go switches, the lay down board and two feet behind and on each side the game board.

“Prize Category” means a prize, or group of prizes of comparable value, available to a player upon completion of the task necessary to win a prize in a particular category or available to a player by “trade up.

“Professional quality” means that the surface of the sign to be used must be smooth and rigid in nature and not made from paper or corrugated cardboard, unless laminated.

“Round of play” means the sale of a right to participate, the event that determines whether the player wins or loses and the award of the prize. If there is no winner, the round of play ends when the operator makes a determination that no player has won the game.

“Stand/structure” means any stand, structure, booth, tent, trailer or area in which the game is operated.

“Stop and Go Switch” means an electrical push-button switch or similar device approved by the Commission, which enables a player to activate or deactivate the indicator or game board.

“Trade up” means trading multiple prizes of a lower prize category for a prize in a higher prize category.

**CONDITIONS:**

- 1.) The maximum price to play shall not exceed values set forth in N.J.A.C. 13:3-3.4.
- 2.) The play field shall be clear of all obstructions.
- 3.) The play field shall be contained within the stand/structure in which the game is located.
- 4.) No merchandise shall be allowed in or around the stand/structure for sale or display purposes only.
- 5.) All prizes displayed must be available to be won either in a single round of play or by trading up through continued play.
- 6.) All prizes available though the play of the game shall be conspicuously displayed above the front counter height of the stand/structure.
- 7.) Prizes displayed shall be labeled to indicate requirement necessary to win the prize. Prizes shall be labeled individually or as a clearly delineated group requiring the same game outcome to win .
- 8.) A sign explaining prize category trade up requirements shall be conspicuously posted at all times during the operation of the game.
9. The minimum size of a sign containing the statement required by Condition Number 8 of this certification shall be 8.5 inches x 11 inches. The sign shall be of professional quality and shall consist of block letters of at least .50 inch. The background and the letters of the sign shall be printed in contrasting colors. Electronic signs complying with the standards set forth herein may be used
10. If the flapper comes to rest directly on a peg, the winning segment is the segment from which the indicator or game board has traveled.
- 11.) If an indicator utilizes a flapper, the winning number, name or symbol is the one in the segment of the game board in which the flapper rests.
- 12) This game shall have a minimum of six sets of stop and go switches available to players at all times. Six single switches that operate as both a stop and go switch may be utilized. If a stop and go switch is out of order, it shall be removed from the play field until it is repaired to proper working order. A stop and go switch that is bot working properly or has been removed from the play field, shall not be counted when determining the number of stop and go switches available to players

- 13.) All stop and go switches shall be located along the lay down board in a location easily accessible to all players.
- 14.) During game play, the rotation of an indicator or game board shall only be activated or deactivated by a player.
- 15.) The master control switch shall not be capable of activating or deactivating a rotating indicator or game board.
- 16.) The mechanism utilized to rotate an indicator or a game board shall not incorporate any clutch, brake or timing device, except:
  - a.) a timing device which renders all of the stop switches inoperative for a minimum time period of three seconds after any go switch is activated; and
  - b.) a clutch which allows the game board or indicator to continue spinning after a player deactivates the motor.
- 17.) The game board shall contain an individual segment for each number, name or symbol, displayed on the lay down board. No lay down board shall bear a number, name or symbol not displayed on the game board. No game board shall bear a number, name or symbol not displayed on the lay down board.
- 18.) All lay down boards shall be easily accessible to all players and securely attached to a horizontal surface on the counter of the stand/structure containing the game.

This Certification of Permissibility is not a license to operate the captioned gambling device. The game must be licensed in accordance with the Law and Regulations.

The Commission reserves the right to suspend, revoke or modify this Certification of Permissibility upon notice to the manufacturer, operator and/or applicant.
